The exhibitors with the number(s) indicated on the right side of their names are interested in dealing foreign products in home market in Japan, for example as a distributor. The interested products groups are classified as follows:

- ① Electromedical equipment / Medical Technology
- ② Laboratory Equipment
- ③ Diagnostics
- ④ Physiotherapy / Orthopaedic Technology
- ⑤ Commodities and Consumer Goods
- ⑥ Information and Communication Technology
- ⑦ Medical Services and Publications

- Furnishings/Equipment for day rooms and dining rooms

Lavatory is one of the most frequently used spaces in the house. We provide universally user-friendly washstands.

"LAP" is a completely new, electrically height-adjustable washstand, which can suit the user's stature and posture. Its design makes it safe and convenient for all ages and levels of ability - from children to the elderly including wheelchair users and people physically challenged.

We are specialists of custom-made furniture to meet the various needs of each customer. "LAP" is a product that we have consolidated what you might want to have or like to have in both of design and function. It is intended to not only wash your hands and face but also enjoy comfort and excellent design. You can choose high-grade natural materials such as sliced veneers which can be felt warmth and textures of a natural tree or natural marble countertops. They make the space appear more luxurious and fancier. "LAP" fits your lifestyle perfectly and improves convenience while ensuring good design. Close to You

< Product Summary >

- Adjust the height to fit the user's stature and posture with just pushing a button
- Not only for medical and welfare facilities but also for home care
- Improve convenience and independence of people in need of nursing care
- Decrease caregivers' burden

A double guide-type tendon sheath incision tool is developed as a surgical tool used to treat stenosing tenosynovitis (trigger finger). This surgical tool can treat trigger finger by using ultrasonic diagnosis, find the sheath where is restricting the tendon and incise about only 2mm to insert the tool and to cut the sheath. In conventional procedure, it need to incise about 20mm and takes much time to heal, but using this new tool, operation can be done in less invasive manner and need only 2 day to heal.

- Valves, flow control

The MR16 Series shortens analysis with the industry's first mechanical visual indicator for the valve's opened/closed states and greatly reduces workload when restoring equipment anomalies or maintenance. The optional sensor allows for external monitoring of the valve's states and is IoT compatible.

We challenge ourselves to expand the potential of Stainless Steel Tubing product globally. In 2015, we developed 35G stable production line. Currently, we are in a product to reach WT0.01mm. Since 1970, we have expanded our business from a small factory manufacturing stainless steel tubing to world-class facilities based in Japan and S.Korea expanding our portfolio from "Medical SS Tubing" to now catering to various industries. With our commitment to constantly growing globally, we have expanded to the United State with our first international marketing office in Boston. In 2013, Teshima established a new facility in Tetebayashi, Gunma Japan to improve production efficiency, R&D and customer service. As a global company, Teshima will expand its production capability and production traceability IT system at the new facility.

Masaki Watanabe is talking to a business partner from Saudi Arabia during MEDICA.

ITO CO., LTD., based in Tokyo, is a Japanese manufacturer of physiotherapy and rehabilitation equipment. The company, which was founded in 1916 and had **100th year anniversary in 2016**, has been using MEDICA as a platform for conducting negotiations with its agencies, finding new business partners, presenting new products and getting to know new trends since 1998.

Masaki Watanabe is responsible for the participation in MEDICA and is coordinating the meeting with agencies and new business partners. "At MEDICA, we meet distributors from all over the world, present new products to them and hold planning meetings with our agencies. There is nothing more effective!"

And the following example shows how successful this can be : Via the Italian distribution partner with which ITO got into contact at MEDICA, the company is now supplying the renowned Italian football club with palm-sized ultrasound therapy devices.

ITO is also aiming at sustainable success at the other fairs of the "World of MEDICA" product family. "We first made contact with our exclusive distribution partner in Thailand at MEDICA. Our business relationship began at our second encounter – which was at the MEDICAL FAIR THAILAND. That was around five years ago, but we are now generating an annual transaction volume of over 20 million yen [175,000 Euros] with these partners." says Watanabe.

Messe Düsseldorf Japan, Ltd.
22 Years' Experience in Japan's Medical Sector

When it comes to the Japanese medical and healthcare market, there are few companies who have the same experience and insight that Messe Düsseldorf has. For the past 22 years, Messe Düsseldorf Group has been operating in Japan via its subsidiary Messe Düsseldorf Japan, Ltd., bringing Japanese exhibitors and visitors to the MEDICA & COMPAMED in Düsseldorf and related medical trade shows all over the world. During this time, we have built close relations with all major Japanese medical associations and other industry groups, and we have been continually monitoring the domestic medical and health-related devices market. Naturally, we follow international trends as well. Through our presence at the leading Japanese medical trade fairs, we exchange opinions with industry leaders and players, many of whom are repeat exhibitors at Messe Düsseldorf trade shows.

Based on our in-depth knowledge of the Japanese market and our strong network, we provide support to foreign companies in the medical and health business in the following areas:

- **Market Intelligence:** MDJ provides market studies on the structure of the Japanese medical market and its players. We also monitor trade journals to produce timely market intelligence reports for clients.
- **Trade Fair Participation:** Being a trade fair company, of course trade fair participation is our specialty! We handle all interactions with Japanese trade fair organizers, book the space, arrange booth creation, supply personnel and take care of every detail, including professional follow-ups with visitors and the press.
- **Market Access:** Messe Düsseldorf Japan will put you in contact with potential business partners, arrange meetings, and assist in preparing materials suitable for Japanese audiences. We handle the necessary follow-ups once you are at home, and help take care of your future customers.

In short: *We are here to help you!* Messe Düsseldorf Japan, Ltd.
