All of our products, TAKEFU are made from 100% bamboo and it is regenerated cellulose fiber. We started development from 1999 and spend 23 years. On the date of Oct. 2, 2001 we found rare antimicrobial in TAKEFU. Aiming real usage at health care sight, we have been spending material development through 21years. In the year of January 19, 2018, our TAKEFU was registered as absorbent gauze by Japanese Ministry of Health. From 2022, we will start full-scale production of the pulp as 50,000t/year. We are aiming to be global partner in the market of clothing, food, and housing. This time participation to MEDICA2022 is our first greeting to global markets.

When it comes to the Japanese medical and healthcare market, there are few companies who have the same experience and insight that Messe Düsseldorf has. For the past 28 years, Messe Düsseldorf Group has been operating in Japan via its subsidiary Messe Düsseldorf Japan, Ltd., bringing Japanese exhibitors and visitors to the MEDICA & COMPAMED in Düsseldorf and our medical trade shows worldwide which is under the brand name MEDICAlliance. During this time, we have built close relations with all major Japanese medical associations and other industry groups, and we have been continually monitoring the domestic medical and health-related devices market. Naturally, we follow international trends as well. Through our presence at the leading Japanese medical trade fairs, we exchange opinions with industry leaders and players, many of whom are repeat exhibitors at Messe Düsseldorf trade shows.
